

# BRETT COOLEY

## WORK EXPERIENCE

### DYNAMX CONSULTING

*Research Assistant/Systems Administrator*

*Current, from July 2011*

Assist President and Primary Investigator with Department of Defense funded modeling and simulation research projects. Also administer a public facing website which includes a Drupal installation, and provide technical support and training on both software and hardware issues.

### WILLIAM & MARY COMPUTER SCIENCE

*Research Assistant*

*Current, from September 2011*

Conduct independent research on computer security topics under Dr. Haining Wang, focusing on expanding personal research on Android security. Currently the only undergraduate in the Computer Science department with a research assistantship.

### WILLIAM & MARY COMPUTER SCIENCE

*Lab Consultant*

*Current, from January 2011*

Assist entry level Computer Science students with class projects and homework, focusing on reinforcing basic programming concepts and best practices. Also advise all students on departmental lab procedures and Unix related questions.

## SKILLS & TOOLS

### PYTHON

Extensive experience with python and the standard library. Used for developing FTP clients, parsers, systems monitoring utilities, and graph manipulations.

### OTHER LANGUAGES

Experience in C, C++, Bash, Assembly (MIPS), and Java. Areas of focus include Android applications, system level networking, large dataset processing, and multi-threading.

### TOOLS (In order of preference)

Text Editing	Sublime Text, nano, vim
Typesetting	L <sup>A</sup> T <sub>E</sub> X
IDE	Sublime Text, Eclipse
Version Control	git, Subversion
Testing & Virtualization	VirtualBox

## RESEARCH & PROJECTS

### ANDROID ACTIVITY SPOOFING

Ongoing research project dealing with tricking users into leaking their credentials to third parties via spoofing trusted activities.

### DRUPAL

Open-source Python scrip which automates updating Drupal installations. Currently under active development.
